OUR HORTICULTURAL FUTURE Has No Shadows

Occasionally a doubting Thomas ventures to lift his voice with gloomy croakings as to the future of horticulture in our province, with especial reference to the Okanagan, pointing out the huge number of trees now being planted annually, declaring that within the span of a very few years fruit will be produced in such quantities as to be a drug on the market and citing the prune and grape industries in California and Oregon to bolster up his case. We are quite prepared to grant the possibility of over-production of certain varieties of fruit, should people be so rash as to disregard the advice of those who have been in the business for years and rush into indiscriminate planting of the tender sorts which will not stand transportation to a distance. If tyros in the horticultural art would ever bear in mind that the strictly home market will always be limited, then there will be little danger of over-production, as only such varieties will be grown as will stand transportation to remote markets.

Prof. Thornber, on his recent visit here, expressed the opinion that this particular part of the Okanagan is best suited to apples and peaches, and warned growers against planting too many of the tall varieties of apples which are comparatively soft and will not stand hard knocks and the uneven temperatures of ordinary freight cars. The warning cannot be too strongly laid to heart, and the eyes of orchardists should be directed to the farway markets which can be reached only by the latest and best varieties. When some would urge that the Okanagan valley is too remote to possess the British market as a factor, the example of Tasmania, that distant island in the southern seas a month's journey by steamer from London, may be cited. A writer in the English paper "Tit-Bits" says:

"Thousands to-day are making fortunes in the cultivation of the apple in far away Tasmania, said a fruit grower who was on a visit to this country from the colony, to the writer the other day.

"The island may well be described as the fruit grower's paradise. An expert agriculturist with a ten-acre orchard, can not only make a good income in a healthy occupation amid ideal surroundings, but find at the end of the season a very substantial balance at his bank.

"It is in the Huon District, so named from the river of that name which flows through it, where the finest apple orchards are to be found. Curiously enough, it is very rare to find one man owning an orchard more than fifty or sixty acres in extent. The majority of them range from fifty to thirty acres, while a ten acre orchard is regarded as ample size, and five or six acres of good orchard land is considered quite enough to keep a family in comfort.

"There are two orchards next to mine owned by two Scotsmen. They came out some few years ago, purchased the land at the modest sum of 10s an acre from the government, cleared it and planted apple trees upon it.

Last year both of them netted over £1,500 apiece, entirely out of the sale of apples. Many a man, if he manages his ten acres of land properly, can make £500 to £600 profit at the end of the season. Some men I know are now making as much as £1,000 a year from their ten-acre patches.

"The result is that some ten-thousand people in the island are now growing apples, yet they cannot supply the demand. The sawmills in the colony could not turn out enough boxes last season to pack all the apples that were grown. The principal reason why the colonists are making nice little fortunes out of their apples is because the fruit has now captured the British markets. It required twenty-seven large steamers to carry the quantity taken by Great Britain last season. The value of the industry to the colony is not less than £250,000."

These results have been achieved solely through the magnificent colouring and excellent quality of the Tasmanian fruit, which hitherto has had no rival on the British market, but the size, vivid tints and fine flesh of the British Columbia apples shown now for several years past at the Royal British Horticultural Society's show in London have brought a change, and all that remains to put our fruit on a parity with that of our Antipodean brethren, if not to displace it in favour with the British consumer, is to secure rapid and certain shipping facilities. This is by no means an insurmountable barrier. The American railways have found it good policy to swell their traffic receipts by a good car service and careful handling of Hood River fruits, for instance, and the C. P. R. is gradually becoming convinced that similar provisions must be made for British Columbia. With our apples sent across the continent in eight to ten days by fast freight trains in specially constructed cars, the Atlantic trip is a bagatelle compared to the long voyage from south of the Equator and it should be possible to land our fruit in London within eighteen days from the time it leaves the packing-house in British Columbia.

The British market is insatiable for apples of first grade, and British Columbia can never glut it. Prices may not keep the same high level as they do now, which will be all the better, within reason, as the lower the price the wider the circle of consumers, and our fruit instead of being a rich man's luxury alone may become a household necessity at still a very profitable figure. The figures fetched by Tasmanian fruit are rather out of the poor man's reach, and seem exorbitant to us, but so long as they obtain, British Columbia fruit growers will have no objection to enjoy them too. The father of the writer paid 8d or 16 cents per lb. for Tasmanian apples in the Old Country, apparently an average price for apples of the best quality.

In former articles we have quoted the enormous returns earned by Wenatchee, Wash., and Hood River growers from their orchards, and it is not necessary to recapitulate them. At home, most of our readers

Every Day is Bargain Day at Calder's

KELOWNA OUTFITTING STORE
W. B. M. CALDER, Prop.

have some acquaintance with the returns of T. W. Stirling's famous orchard, and with the British market kept in view, let alone the ever expanding market of the prairie provinces peculiarly belonging to British Columbia, there is every prospect of a high standard of profits being maintained for years to come. One authority considers an apple orchard a long term of investment, stating that an apple tree does not reach its maximum yielding age until it is forty-five years of age, and that frequently trees are found in profitable bearing condition that are over one hundred years old.

What investment, then, can compare with an orchard? In the great number of manufacturing businesses, building houses for renting, and enterprises of every description provision must be made yearly for depreciation, but in apple growing appreciation instead goes on for year after year, while no depreciation can be reckoned on during at least the span of a long human life. The horticulturist who studies his occupation, which he must do if he would succeed, need never fear the cold blasts of poverty, and small blame to him if he feels somewhat "sair uplifted" that his calling was the first to be followed by mortal man on the face of the new-born earth.

Vanity Makes Mistake.

A tallon tossed into a corner; a suit that had turned out a misfit.

"It is men's vanity that makes nine-tenths of the misfits," he growled.

"How so?"

"Why, when a man comes in here to be measured he won't stand in his natural way. He is too vain. We go to take his chest measure, and to have the satisfaction of hearing a big number yelled out he puffs out his chest like a pigeon, and then his coat and waistcoat are too big for him. He does the same with his back, stiffening it if he is humped to a military erectness. The same with his shoulders—if they slope he raises them to his ears, and if they are round he throws them back till the shoulder blades clash together. And if his stomach protrudes he draws it in. Thus our measurements are all wrong, and the suit, thanks to the man's vanity, must go to the misfit dealer."

Contract advertisers will please notice that all changes of advertisements must be handed to the printer by Monday evening to ensure publication in the current issue.

THURSDAY, JULY 23, 1908

A HIGH-HANDED PROCEEDING

By Municipal Employees

The editor of the Courier is loath to use the columns of his own paper to voice a personal grievance, but he thinks the attention of the people should be drawn to the conduct of the municipal workmen, acting under orders, who tore down the fence on the west side of his property, Block 30, on Tuesday and proceeded to work on the extension of Eli Ave. through it, so as to prevent a repetition of such arbitrary proceedings.

Unfortunately for the owner, a plan subdividing Block 30 was registered some three years ago, and the Council took advantage of the fact to deny any compensation for the quantity of land required for the extension of Eli Ave. through it, nearly three-quarters of an acre, although the property still remains intact and none of it has been placed on the market. Dr. Boyce, who had not divided his Block 31, received compensation for the land taken. It might have been expected that the Council would be as generous as possible to the owner of Block 30, forced to see his property cut in two, whether he liked it or not, and that they would have at least protected the balance of his land from damage and trespass either by fair notice of the date when the fence was to be removed or by erecting fences along both sides of the new street. Instead, the protecting fence was torn down without notice, the cattle of one of the tenants permitted to stray on the public street, and the crop of the other tenant exposed to injury by trespassers. Whatever the rights of the municipality within the letter of the law, surely it is not the wish of the people that these rights should be enforced in a manner so arbitrary and devoid of common justice.

FIRE PROTECTION

The Underwriters' Report

Grand Forks was visited by a conflagration two weeks ago which destroyed the larger part of the business quarter, causing a loss estimated at \$300,000, yet that city has one of the best fire-fighting organizations for a place of its size in the province. Hitherto, the Grand Forks fire brigade had succeeded in coping with any fires that have occurred, and prevented them from spreading beyond the building in which they originated, but the destructive blaze alluded to took place at an

early hour of the morning in the heart of a block of frame buildings and gained too much headway to be checked. The municipal authorities of Grand Forks, eager to see the town build up rapidly in its early days, imposed no building restrictions, and in the area burned over there was not one brick or concrete building. They now see their mistake, and, at a combined meeting held last week of the City Council and the general public, a universal desire was expressed for the establishment of fire limits, within which buildings of non-combustible materials only would be permitted. Thus the wisdom of our Councils in the past is justified, though the creation of fire limits appeared a hardship to many of us at the time, and there is no doubt the concrete and brick buildings that have been erected would be a great help in breaking the sweep of a fire. Still, the need of water and facilities for fighting fire is pressing, and we need only quote from the report of the B. C. Underwriters, dated May 30, 1908, to show of what little value they consider our present apparatus:

"Town is without fire protection or water supply; depending on gasoline fire engine hauled by hand, capacity 250 gallons per minute. Suction to be from lake, requiring long lines of hose to reach any but a small portion of the town. 600 ft. 2-1/2 inch canvas rubber-lined hose on two hand reels; also one hand engine, built 1850, of no value as fire protection. Fire department disorganized. Town prosperous; population 1,500. Six buildings—5 concrete block and 1 brick—in course of construction. Bonds have been sold to provide money for water system and electric light plant. Plans for water system under consideration by the Town Council."

Surely the foregoing amply sustains the position we have held all along and frequently expressed in these columns that it is the first duty of the Council to provide water and fire protection rather than electric light, which, after all, is a luxury and can easily be dispensed with.

SCHOOL DISTRICTS RE-DEFINED

The boundaries of Okanagan Mission and Westbank School Districts have been re-defined and gazetted as follows:

Okanagan Mission.—Commencing at the middle point of the northern boundary line of Section 27, Township 23, Osoyoos Division of Yale District; thence due east to the north-east corner of Section 28, Township 24; thence due south to the south-east corner of Section 4 of said Township; thence due west to the middle point of the southern boundary line of Section 3, Township 23; thence due north to the point of commencement.

Westbank.—Commencing at the south-east corner of Lot 3,493, Osoyoos Division of Yale District, being a point on the west shore of Okanagan Lake; thence north to the north-east corner of said lot; thence west to the north-west corner of Lot 2,690; thence north-westerly to the north-east corner of Lot 3,313; thence in a north-easterly direction to the north-west corner of Lot 3,866; thence due east to the north-east corner of Lot 668; and thence following the western shore line of Okanagan Lake to the point of commencement.

RURAL HIGH SCHOOLS

Entrance Examinations

The following candidates from Kelowna and neighbouring points were successful at the recent examinations for entrance to rural high schools:

Kelowna: Number of candidates, 5; passed, 4. Ira Dilworth, 701; Hugh Copeland, 607; Rosa Patterson, 606; Dacie Leckie, 570. Mission Creek: Number of

candidates, 1; passed, 1. Harold Renwick, 658.

Okanagan: Number of candidates, 4; passed, 3. Edith Hozier, 649; Lily Patterson, 627; Lillian McLean, 550.

Peachland: Number of candidates, 11; passed, 10. Olive Young, 819; John McLaughlin, 801; Leone Morrison, 703; Gordon McDougall, 675; Gertrude Gummow, 631; Bryson Whyte, 629; William Silver, 613; Hugh Ferguson, 613; Lulu Brown, 582; Harold Miller, 573.

After rather a tedious delay the Board of Trade booklets arrived on Saturday from Vancouver, where they were printed by Evans & Hastings. The pamphlet is a very neat one containing 28 pages of letter-press and illustrations, the whole fresh and up-to-date. The matter is written in an enthusiastic vein, but has been kept free of exaggerations, and the statistics are thoroughly reliable. It is a pity the Board of Trade was so hampered by lack of funds that only a limited number could be secured, as the pamphlet will be found of great value to send to enquirers, and three times the quantity ordered would be little enough.

At long last the efforts of the people of the Okanagan have been rewarded with success—and we may be pardoned if some credit is claimed for the continual hammering of the Board of Trade at the Public Works Department to this end—and \$3,000 appears in the list of federal supplementary estimates for "improvement of navigable channel between Okanagan Lake and Dog Lake." The sum is small, but it is only the beginning, and further expenditures may confidently be expected, if found necessary. \$3,500 has also been voted for the duplication of the Vernon-Kelowna telephone-telegraph line. For vigorous endorsement of their requests and their ultimate concession, the people have to thank their energetic and faithful member, Mr. Duncan Ross.

FARM AND ORCHARD

Fighting Borers

I want to give my experience in fighting borers for the benefit of the members of The Fruit-Growers Family. I wrap my apple trees in the fall with heavy cloth, so it will be double. I dig the soil away to a depth of about three inches and wrap the cloth three inches under the surface and four inches above ground, and leave this cloth until July, then I take the wrappings off and look for borers, but seldom find any, and if I do they are generally on the outside of the bark. I have tried this plan for four years and during that time it has been effective in protecting against borers. Of course, anyone adopting this plan must first remove any borers that may be in the tree when the wrappings are put on.—Nelson Daily News.

Vigilant Mr. Cunningham

On Thursday last Mr. Thomas Cunningham condemned a shipment of California apples which arrived at Vancouver, because they were infected by the codling moth, one of the most deadly enemies to healthy fruit. The shippers were notified of the condemnation and may make their choice between the local incineration of the fruit or its return to the port of shipment. It is the determination of the officials to take no chances on shipments of fruit sent into the country, and Inspector Cunningham desires it to be known that all shipments of doubtful crates or boxes are at the shippers' risk. Every pound of fruit coming into the country will be rigidly examined and where even symptoms of infection are manifest the laws will be enforced.

BORN.—To the wife of Mr. Duncan Wilson, on July 16th, a daughter.

Ten Years Ahead Of All Other CREAM SEPARATORS

1908 Improved DE LAVAL CREAM SEPARATORS are fully ten years ahead of any other machine on the market today. Thirty years of experience, protecting patents, and the many valuable improvements devised and perfected by the DE LAVAL engineers in all parts of the world during the past three years, are responsible for this fact. Every feature of the DE LAVAL has been improved from the supply can to the base. The new centre-balanced bowl with its separate spindle is alone a triumph in separator construction and must be seen to be fully appreciated. Then, there is the new one-piece "anti-splash" sanitary supply can, adjustable shelves for skim milk and cream receptacles, new frame designs, and many other but less important improvements, all combining to make the DE LAVAL an absolutely ideal separator for farm and dairy use. There is the proper size machine for every size dairy from the smallest to the largest and no cow owner can afford to be without one of these improved machines. It will cost you nothing to see and examine the new DE LAVAL, and right at your own home too, if you will but say the word. Our new illustrated catalogue describing the DE LAVAL improvements in detail is sent for the asking. Write us at once and you will receive this interesting booklet by first mail with full information as to how you may have a free demonstration of the improved DE LAVAL at your home. It will pay you to do so and your only regret will be that you didn't investigate sooner.

CANADIAN FORESTRY ASSOCIATION

PRESS BULLETIN No. 9
For Campers

(1.) Don't, when in the woods, throw down a lighted match, cigar-stub or other flaming objects; make sure that the flame has been thoroughly extinguished before throwing it away.

(2.) Don't build your camp fire larger than is necessary.

(3.) Don't, under any circumstances, leave fire unguarded, even for a comparatively short time; see that it is dead out before you go away.

(4.) Don't build your fire in leaves, rotten wood or other inflammable material.

(5.) Don't build your fire against a large or hollow log, where it is hard to be sure when it has been entirely put out.

To these "don'ts" it may be added that in windy weather, or in a dangerous place, it is well to confine the fire in a hole dug clean down to the mineral soil. A fire may smoulder in the humus, or "duff" for days, only waiting for a strong breeze to fan it into a flame that may burn over miles of timber.

Summer tourists and campers unfortunately have a bad reputation among the owners of timber-lands as being a frequent cause of fires. Such fires could be prevented, almost without exception, by a little extra care on the part of the campers, who have been the unintentional cause of much forest destruction, and who have just as real an interest in the preservation of the forests as the owners of the timber themselves. The rules given above are the result of long experience and observation on the part of many woodsmen and lumbermen as to the origin of fires from this cause, and are earnestly commended to the attention of campers, sportsmen and others.

The need for observing them is emphasized by the occurrence a few days ago of serious fires in the Lake St. John district in Quebec, one village being wiped out; the fires are thought to have originated from fires left by fishermen.

CUSTOMS REGULATIONS RESPECTING THE FREE ADMISSION OF ANIMALS FOR THE IMPROVEMENT OF STOCK

On July 1st there came into effect new regulations regarding the custom entry of animals imported into Canada for the improvement of stock. Heretofore all certificates of registration which were apparently genuine were accepted by custom officers for the purpose of free entry. Under the new regulations either a Canadian Certificate of registration or an import certificate as the case may be must be presented.

Canadian certificates of registration must be presented at the Port of Entry for the following classes and breeds:

Cattle—Shorthorn, Ayrshire, Hereford, French-Canadian, Gallo-way, Aberdeen-Angus, Red Polled, Jersey, Guernsey and Holstein.

Horses—Clydesdale, Hackney, Shire, Percheron, Thoroughbred, Belgian and French Canadian.

Ponies—Shetland, Welsh, New Forest, Poloand Riding, Exmoor, Connemara and Hackney.

Swine—Yorkshire, Berkshire, Tamworth, Chester-White, Poland China, Duroc-Jersey, Essex and Victoria.

Sheep—Shropshire, Lincoln, Oxford Down, Dorset, South-down, Hampshire and Leicester. The Canadian Records for all

above mentioned breeds with the exception of that for Holstein Cattle are conducted under the Canadian National System in the office of the Canadian National Records, Ottawa. The Holstein record is located at St. George, Ont. In making application for the registration of an imported animal the foreign certificate of registration in addition to the usual application must be forwarded.

There are from time to time animals imported into Canada of breeds for which there are no Canadian Records, but which are recorded in books of records of one of the following recognized foreign Associations,—

Horses—Suffolk Horse Society (Great Britain); Cleveland Bay Horse Society of Great Britain and Ireland; Yorkshire Coach Horse Society of Great Britain and Ireland; American Morgan Register Association; American Saddle Horse Breeders' Association; American Trotting Horse Register Association; Commission des Agriculteurs de France (French Draft); Commission des Stud Book des Chevaux de Demisang (French Coach); Landwirtschaftlichen Hauptverein für ostfriesland (German Coach); Zuchtverband des Sudlichen Zuchtgebietes (German Coach); Verband der Zuchter des Oldesburger eleganten Schwestern Kutschperdes (German Coach); Verband der Pferdezuchter in den Holsteinischen Merschem (Oldenberg).

Cattle—Highland Cattle Society of Scotland; Kerry and Dexter Herd Book (Dublin, Ireland); Sussex Herd Book Society (Great Britain); Polled Durham Breeders' Association (United States); National Polled Hereford Breeders' Association (United States).

Swine—Large Black Pig Society (Great Britain).

Sheep—Suffolk Sheep Society (Great Britain); Kent and Romney Marsh Sheep Breeders' Association (Great Britain); Cheviot Sheep Society (Great Britain); Wensleydale Long Wool Sheep Breeders' Association (Great Britain); Black Face Sheep Breeders' Association (Great Britain).

Goats—British Goat Society, Asses—Societe Centrale d'Agriculture des deux Sevrès (France); Stud Books of Jacks and Jennets of Spain.

To secure free custom entry for an animal it is necessary to forward to the Canadian National Records, Ottawa, the foreign certificate of registration. The Accountant of the Canadian National Records will return to the importer the foreign certificate to which will be attached an import certificate which will be authority to the custom officer to admit the animal duty free. A nominal charge will be made by the National Record for this service.

If further information is desired such will be supplied on application to the "Accountant", National Live Stock Records, Ottawa.

FRUIT FOR JELLY MAKING

(From the Canadian Dairyman)

An acid fruit is the most suitable for jelly making, though in some of the acid fruits, the strawberry, for example, the quantity of jelly making pectin is so small that it is difficult to make jelly with this fruit. If, however, some currant juice be added to the strawberry juice, a pleasant jelly will be the result; yet, of course, the flavor of the strawberry will be modified. Here is a list of the most desirable fruits for making jelly.

The very best-are given first:

currant, crabapple, quince, grape, blackberry, raspberry, peach.

Apples make a very mild jelly, and it may be flavored with fruits, flowers, or spices. If the apples are acid it is not advisable to use any flavor.

Juicy fruits such as currants, raspberries etc., should not be gathered after rain, for they will have absorbed so much water as to make it difficult, without excessive boiling, to get the juice to jelly.

If the berries are sandy or dusty it will be necessary to wash them, but the work should be done very quickly so that the fruit may not absorb much water.

Large fruit such as apples, peaches, and pears must be boiled in water until soft. The strained liquid will contain the flavoring matter and pectin.

It requires more work and skill to make jellies from the fruits to which water must be added than from the juicy fruits. If the juicy fruits are gathered at the proper time one may be barely sure that they contain the right proportion of water. If gathered after a rain the fruit must be boiled a little longer that the superfluous water may pass off in steam.

In the case of the large fruits a fair estimate is 3 qts. of strained juice from 8 qts. of fruit and about 4 qts. of water. If the quantity of juice is greater than this it should be boiled down to 3 qts.

Apples will always require 4 qts. of water to 8 qts. of fruit but juicy peaches and plums will require only 3 to 3½ qts.

The jelly will be clearer and finer if the fruit is simmered gently and not stirred during the cooking.

It is always best to strain the juice first through cheesecloth and without pressure. If the cloth is double the juice will be quite clear. When a very clear jelly is desired the strained juice should pass through a flannel or felt bag. The juice may be pressed from the fruit left in the strainer and used in marmalade or for a second quality jelly.

To make jelly that will not crystallize (candy) the right proportion of sugar must be added to the fruit juice. If the fruit contains a high percentage of sugar, the quantity of added sugar should be a little less than the quantity of fruit juice. That is to say, in a season when there has been a great deal of heat and sunshine there will be more sugar in the fruit than in a cold, wet season; consequently, 1 pt. of currant juice will require but ¾ of a pt. of sugar. But in a cold wet season the pt. of sugar for a pt. of juice must be measured generously.

Another cause of jelly crystallizing, is hard boiling. When the syrup boils so rapidly that particles of it are thrown on the upper part of the sides of the preserving kettle they often form crystals. If these crystals are stirred into the syrup they are apt to cause the mass to crystallize in time.

In preserving, canning, and jelly making, iron or tin utensils should never be used. The fruit acids attack these materials and so give a bad color and metallic taste to the products. The preserving kettles should be porcelain lined, enameled, or of a metal that will not form troublesome chemical combinations with fruit juices. The kettles should be broad rather than deep, as the fruit should not be cooked in deep layers. Nearly all the necessary utensils may be found in some ware not subject to chemical action.

Synopsis of Canadian Homestead Regulations.

ANY available Dominion Lands within the Railway Belt in British Columbia, may be homesteaded by any person who is the sole head of a family, or any male over 18 years of age, to the extent of one-quarter section of 160 acres more or less.

Entry must be made personally at the local land office for the district in which the land is situate. Entry by proxy may, however, be made under certain conditions by the father, mother, son, daughter, brother or sister of an intending homesteader.

The homesteader is required to perform the conditions connected therewith under one of the following plans:

(1) At least six months' residence upon and cultivation of the land in each year for three years.

(2) If the father (or mother, if the father is deceased), of the homesteader resides upon a farm in the vicinity of the land entered for, the requirements as to residence may be satisfied by such person residing with the father or mother.

(3) If the settler holds his permanent residence upon farming land owned by him in the vicinity of his homestead, the requirements as to residence may be satisfied by residence upon the said land.

Six months' notice in writing should be given to the Commissioner of Dominion Lands at Ottawa of intention to apply for patent.

COAL.—Coal mining rights may be leased for a period of twenty-one years at the annual rental of \$1.00 per acre. Not more than 2,500 acres shall be leased to one individual or company. A royalty at the rate of five cents per ton shall be collected on the merchantable coal mined.

W. W. CORY,

Deputy of the Minister of the Interior.
N.B.—Unauthorized publication of this advertisement will not be paid for.

O. D. Fisher,
B. F. Green, Agent.

THE VERNON FAIR

Prize List Already Issued

We are already in receipt of the prize list of the Vernon fall fair, which has been issued with commendable earliness. Vernon is making a special effort this year to have a better exhibition than ever, and large appropriations have been made for prizes, amounting to \$2,600 for the exhibition proper and \$1,750 for the races. The directors have also been successful in securing a number of valuable cups for competition. A new exhibition building is being erected, also a poultry house and machinery building. The programme includes lacrosse, baseball and football matches, and the entertainment provided should be varied enough to attract a large attendance.

The A. & T. Association here might take a leaf from Vernon's book, and it is not too late to get things going for a successful fair this year, if the directors will bestir themselves and enlist the active co-operation of the people of the valley. It should not be a Herculean task to remove the financial burden that rests on the Association, if a determined effort is made, and it certainly will not improve its condition if the fair is not held or only a half-hearted attempt made.

We have always felt that the farming portion of our population do not give the A. & T. the support it deserves, seeming to rely on Kelowna shouldering the heavy end of finances. This is not equitable, when the fair is a great and direct benefit to the landowners of the valley. There is no better advertisement, or one that can more quickly create a demand for property and enhance its value, than a successful exhibition, and every owner of agricultural land in the district should cheerfully contribute a round sum to relieve the Association of its difficulties.

The Celebrated Percheron Stallion

"KIM" REG. NO. 32,923

in the Percheron Stud-book of America. The property of the Kelowna Land & Orchard Co., Ltd. Will stand for service during the season of 1908, at Priests' Flat Ranch, and will also travel as follows:—
MONDAYS—From K.L.O. stable to McIntosh's ranch.
TUESDAYS—Swallowell's to J. McClure's.
WEDNESDAYS—From J. McClure's, through Dry Valley to Eccleston's.
THURSDAYS—K.L.O. ranch.
FRIDAYS—Crawford's.
SATURDAYS—Kelowna.

HORSE BREEDERS' LIEN ACT
FORM A
Government of British Columbia, Department of Agriculture.
Certificate of Pure Bred Stallion No. 32923.

The Pedigree of the Stallion, Kim, described as follows: Colour, black, star. Foaled, April 4th, 1902. Bred by W. H. Miller, Alpena, South Dakota.
Sire, Titus II, No. 21634.
1st Dam, Alleta (20968) by Faisant, No. 9288 (10984).
2nd Dam, Arrita (9609) by LaFerte, No. 5144 (452).
3rd Dam, Alene (4392) by Brilliant, No. 1271 (755).
4th Dam, Amelia (2733) (1533) by Romulus.
5th Dam, — by Jean-Bart, No. 716.

Has been examined in the Department and I hereby certify that the stallion is of pure breeding and is registered in a stud-book recognised by the Department.

Season, \$16; to insure, \$25

THE IRRIGATION CONVENTION AT VERNON

Attractive Programme Being Arranged (Contributed)

For some time past, the Executive Board of the Western Canada Irrigation Convention has been holding regular weekly meetings in Vernon to make the preliminary arrangements for the Irrigation Convention to be held in that City during the week beginning August 10th, and the success of that important gathering now seems assured.

Among the interesting papers that will be read are: One on "The Law Relating to the Use of Water for Irrigation", by J. S. Dennis, Assistant to second Vice-President Whyte of the C.P.R., one on "The Grey Canal Irrigation System", by A. F. Ashcroft of Coldstream; one "Irrigation in its relation to Forestry", by Senator W. C. Edwards, etc.

A most attractive feature will be the three day excursion to points on Okanagan Lake, planned so as to give the visitors an opportunity to observe all the irrigation systems at present in operation in the Valley. Leaving Okanagan Landing early in the morning of Thursday the 13th inst. the first stop will be at Kelowna, where arrangements have been made to drive the delegates over the systems of the Kelowna Land and Orchard Company, and of the Central Okanagan Land & Orchard Company. Next morning an early start is made and stops are made at Peachland, Summerland and Naramata, at all of which the visitors are assured a most cordial and enthusiastic reception. After spending the night at Penticton, early on Saturday morning the return north is begun, the trip winding up with a visit to Okanagan Centre, where one of the most interesting systems in the Valley will be observed, the syphon principle being employed to carry the water over a height of land.

Apart from the more solid benefits derived from the business side of the Convention this excursion to the most important points in the famous Okanagan Valley cannot but be as enjoyable as it is certain to be profitable, and will doubtless attract a large number of delegates to the gathering.

HOW TO PRESERVE Fruit for Exhibition Purposes

The Colorado Experiment Station makes the following suggestions regarding the preservation of fruit for exhibition purposes, not for consumption. It should be noted that the preservatives are generally of a very poisonous nature, and great care should be taken in keeping them and the fruit so preserved out of reach of children.

The specimens to be preserved should be the most perfect obtainable, free from all blemishes and imperfections. In most cases fruit of a fair degree of ripeness is better than partly green specimens.

Exhibition jars should be of clear, white glass and preferably with ground glass stoppers. The tall cylindrical form is desirable, especially for the smaller fruits.

The sorted fruit is first carefully placed in the jar which is then filled with clear water. After standing a short time the water should be poured off so as to remove all particles of dirt from the jar and contents. The jar may then be filled with the preserving fluid until the time for exhibition. Frequent examination should be made to determine how well the fruit is keeping. If the liquid

becomes colored from the fruit, it should be poured off and replaced by fresh fluid.

The following formulas have been successfully used by the Colorado Agricultural College, especially with plums, grapes, cherries, currants and gooseberries:

Formalin, five parts; saturated solution of common table salt, ten parts; water, (boiled and cooled) enough to make 100 parts. This may be made up by measures as follows: Formalin, one pint; salt solution, two pints; water, seven-teen pints.

When made up the solution will keep indefinitely. Another solution weaker in formalin has also been used here satisfactorily. The proportions are: formalin, three parts; salt solution, ten parts; water enough to make 100 parts.

For raspberries, the following mixture is recommended: formalin, one part; glycerine, ten parts; water, eighty-nine parts. Strawberries may be preserved fairly well in a saturated solution of common salt, and better still in a fluid composed of formalin, one ounce; alum, one drachm; glycerine, five ounces; water, three pints.

Red currants keep best in a solution of corrosive sublimate, one part, glycerine, ten parts; water, ninety parts.

The corrosive sublimate must be dissolved in hot water and the solution and fruit preserved in it should be labeled poison, as it is a very deadly one if swallowed.

The glass stoppers of bottles and jars may be made perfectly tight by smearing the ground surface with a small amount of light colored vaseline. This will also prevent, in a great measure, the sticking of the stoppers when it is desired to remove them.

KELOWNA RIFLE ASSN.

Weekly Scores

There was a small turn-out at the practice on Thursday last. The morning had been wet, but the afternoon was fair with sunshine and cloud alternately and a slight wind, and conditions were not of the best for good shooting, yet fair scores were made. Scores:

200 yards
A. O. Burnett 3-5, 3, 3, 4, 5, 5-30
Axel Eutin 2-4, 5, 5, 3, 5, 3-30

LOCAL NEWS

We shall be obliged if Contract Ad-
vertisers will note that all changes of ad-
vertisements should be handed in by
Monday evening to ensure publication
in the current week's issue. Last week,
several changes of large advertisements
were sent in so late that publication was
delayed until Friday, and we do not in-
tend that this shall occur again, but we
hope our Advertisers will co-operate
with us in bringing out The Courier
promptly on Thursdays.

Mr. H. T. Meugens left for Nelson
on Tuesday.

Mr. M. C. Kendall returned to
Penticton on Monday.

Mr. E. M. Carruthers paid a visit
to Vernon on Friday.

Mr. J. T. McLellan returned to
Vancouver on Friday.

Rev. H. P. Thorpe was a visitor
to Vernon on Tuesday.

Mrs. J. N. Thompson paid a visit
to Penticton on Friday.

Mr. Brathwaite, of Wolsley,
Sask., is visiting Mr. R. A. Copeland.

Mr. Wilson Henry made a busi-
ness trip to Peachland on Monday.

Mr. E. D. Langille's children ar-
rived from Nova Scotia on Tuesday.

Mr. W. R. Megaw, of Vernon, paid
a business visit to town on Monday.

Miss McNaughton went to Okana-
gan Landing on Saturday to spend
the week-end.

Mr. W. G. Benson, of the Bank of
Montreal, left on Friday for a vaca-
tion at the Coast.

Mr. J. Bowes returned safe and
sound on Tuesday from an extended
trip to the prairies.

Dr. Gaddes went to Vancouver on
Monday, and will probably bring
back some prospective settlers with
him.

Mr. E. W. Dunn, of the Kelowna
Club, went to Sicamous on Mon-
day to meet his brother from Eng-
land.

Mr. and Miss Batchelor, of Na-
huan, were visitors in town on Mon-
day.

Dr. Keller's house on the corner
of Pendozi St. and Bernard Ave. is
being moved preparatory to erect-
ing a business block on its site.

The Directors of the Hospital
beg to acknowledge with thanks re-
ceipt of \$10, annual subscription,
from Mr. R. H. Parkinson, and \$5
from "Anon." per Mrs. Boyce.

There will be no service in St.
Michael and All Angels on Sunday,
as the Rev. Thos. Greene, rector, is
to officiate at Mr. W. D. Walker's
house at Okanagan Mission, at 3
p.m.

We are glad to learn that Master
J. Kincaid has passed successfully
the McGill matriculation examina-
tions, and we wish the young schol-
ar every success in his academic
career.

Miss Wade B. A. has been appointed
teacher in charge of Division III of
Kelowna Public School, vice Miss
Morrison, resigned. Miss Wade holds
splendid recommendations from
school boards in Manitoba and Al-
berta.

Old-timers in the valley will be
interested to learn that Mr. Harvey
G. Watson, who was teacher of
the school at South Okanagan some
twelve years ago, became the proud
father of triplets, boys, in Vancou-
ver a few days ago.

We are indebted to Mr. J. R. Camp-
bell for some excellent peaches and
apricots grown on Sunnyside Ranch,
Westbank. He brought them in on
Friday, and we would like to know
if anyone in the district had any
earlier fruit of similar kinds.

Mr. R. Minns made a business trip
on Monday to Summerland in con-
nection with an outfit of wood-
working machinery he has purchas-
ed there, and which he will install
in a new building to be erected at
the corner of Pendozi St. and Law-
rence Ave.

A special service for young men
will be held in the Baptist Church
next Sunday evening at 7.30, when
Mr. J. W. Whiteley, provincial or-
ganizer, Loyal Orange Association,
will give an address on "Citize-
ship." A cordial invitation is extend-
ed to all.—Con.

Mr. and Mrs. W. J. Greenless and
children, who had been paying a vis-
it to Mr. J. W. Jones, left on Tues-
day for the Coast, which they will
tour before returning to their home
at Wolsley, Sask. They were
charmed with Kelowna, and may be
trusted to sing its praises to their
prairie friends.

Who could fail to fall in love with
Kelowna these beautiful days? It is
hot, no doubt, but what about those
cooling breezes from the blue waters
of the lake? Think of the poor suf-
ferers in the canyon streets of New
York sweltering in the humid heat
with never a breath of fresh air
to break its oven-like stillness, and
be glad you are a Kelownian!

The excursion of the Sunday
Schools of the various churches to
Okanagan Centre last Thursday
was marred considerably by wet
weather in the morning, but the
showers cleared off in the after-

noon, and the excursionists seem to
have enjoyed themselves. About 125
children and 100 adults composed
the party.

The Kelowna lacrosse team met
with defeat at Armstrong on Wed-
nesday of last week by a score of
5 to 2. The Armstrong boys played
a very rough game, and many of
the Kelowna team came home with
sore eyes and cuts. It is a pity
such a fine game as lacrosse should
so frequently be spoiled by unsports-
manlike behaviour.

The Farmers' Exchange are doing
a large shipping business already
this season. Up to July 22nd last
year, only one car of summer pro-
duce had been shipped, while this
year up to July 21st, five cars have
been shipped from here and six cars
under the Exchange's billing from
Okanagan Centre and Vernon. They
also expect to ship five additional
cars by today.

The cigar factory commenced op-
erations on Monday with nine hands.
Mr. P. Prozesky having arrived
from Winnipeg on Saturday. This
is merely a start, and a much lar-
ger number of people will be em-
ployed within five or six weeks' time.
The local product should soon be
on the market, and all loyal Kel-
ownians should help the industry
along, if they are smokers, by ask-
ing in the stores and bars for the
home-made article, which promises
to be a very excellent one.

Recent sales of Central Okanagan
Land & Orchard Co.'s lands have
been made as follows: Mr. Ernest
England, Vancouver, 10 acres; Mr.
W. M. Sutherland, Edmonton, 10
acres; Messrs. R. McDonnell and En-
nis, both of Grandview, Yukon, 10
acres each. It is encouraging to
note that the valley attracts set-
tlers from such remote regions as
the Yukon, and that it is possible to
get them even from the Coast, in
spite of the baits held out to buy
on the Fraser River alluvial lands.

The Band, succumbing to the uni-
versal desire for coolness, took pos-
session of Mr. Hayman's scow on
Tuesday evening and were towed by
the "Skookum" to Manhattan Beach,
where they serenaded the campers
while afloat on the deep. They were
then towed to a point opposite the
ferry wharf, but they were unfor-
tunately too far out for listeners
on the shore to hear much more
than the thump of the big drum,
and next time they entrust them-
selves to the bounding billows it is
to be hoped they will keep a little
nearer shore, otherwise they will
have only the fishes for audience.

Complaint has been made to the
Water Commissioners that parties
have been in the habit of interfering
with the water bailiffs' duties in
supplying subscribers with water,
even going so far in one case as to
remove the lock. Subscribers who
want water should inform the wa-
ter bailiff, whose duty it is to see
that each one gets his share. That
is what the bailiff is appointed for,
and without such service those who
pay for water would be poorly ser-
ved indeed. Should any one feel
that the bailiff is unjust to him, he
should appeal to the Commissioners,
who will see that no partiality is
shown.

Some rare amusement is promised
for Monday evening next when
teams selected indiscriminately from
the Thistles and Kelowna's will play
football as "Girls" and "Men." The
"girls" will wear approved femi-
nine toggery, and the men will each
wear a hard felt hat which must be
kept on under penalty of not being
permitted to kick at the ball while
it is off. Other rules will introduce
many humorous features into the
game, and a large fat "lady" will
act as referee. Previous to the
match, which will commence at 7
p.m. in the Park, the teams will
parade in grand procession from
Willits' corner to the grounds, head-
ed by the City Band. There will be
an ice-cream hoot in the Park, and
the Band will supply music during
the game. No charge for admission,
but a collection will be taken for
the benefit of the funds of the foot-
ball clubs. Come along and have a
good laugh, and chip in two or four
bits at the least for the boys.

The Regatta Committee have been
energetically soliciting subscriptions
this week, and have achieved mark-
ed success, a sum of about \$500 be-
ing already assured. The pro-
gramme will be spread over two
days, Wednesday and Thursday, Au-
gust 12th and 13th, and there will
be some especially good features on
the evening of the second day which
will aid in the entertainment of the
visiting members of the Irrigation
Convention. With good weather,
which is practically certain at this
time of year, the regatta should be
a huge success, and we hope it will
be perpetuated as Kelowna's one
special event, leaving Victoria Day,
Dominion Day and Labour Day to
the other lake towns, if they wish.
By an amicable arrangement of
dates all the petty jealousies in re-
gard to such matters would be
swept away, and the danger would
be removed of a recurrence of the
ill-feeling between Summerland and
Penticton engendered over the Domi-
nion Day celebration at the latter
place.

VERNON, B. C.

Do You Want a Buggy?

You might just as well have
the best you can get.

McLaughlin buggies are
famed for their elegance of
style and wonderful durability.

For forty years the Mc-
Laughlin Carriage Co. have
produced rigs which have es-
tablished their motto of "One
Grade Only, and that The
Best."

Why McLaughlin Rigs Are Noiseless

They have Rubber and Brass Washers. Steel against steel
makes a noisy, unserviceable bearing; steel against leather
makes a hard running and short lived bearing; steel against
brass makes the smoothest running and longest lived bearing
known to modern mechanics. That's what the McLaughlin have.

The People's Store

The Big Sale Continued

Many of our customers complained that they found it impossible to take advantage of the great bargains advertised for last Saturday only, and that they would be pleased if we would give them another opportunity to save so much on the seasonable goods listed below, consequently we have decided to continue the sale for three more days, viz:

Monday, Tuesday and Wednesday
July 27, 28 and 29

Positively this sale will end on July 29th, after which date the regular prices will prevail.

Hadn't you better take advantage of the reduced prices while they last?

Ladies' Wash Goods

**33 ⅓ Per Cent.
discount**

Our ready-to-wear ladies' goods are nearly all gone. We still have a few very good snaps which we are anxious to clear. The discount is a liberal one at this season of the year when summer goods are in such demand. This sale applies to corsets, muslins, dress goods, ladies' hosiery, white wear, underwear of all kinds, blouses, summer suits, linen and duck skirts, belts, ribbons, etc.
